

## Installing CE-200 version 1.0.0.0, or 1.0.0.1, or 1.0.0.2 on Windows Vista (32 bit) or Windows 7 (32 bit)

## **Installation Instructions:**

- 1. Install Basic software for the SINGER<sup>®</sup> FUTURA<sup>™</sup> machine.
- 2. Installation will reach 100% and then stop; it will appear that the final pop-up screen is just hanging there. Terminate the installation procedure through the 'processes' tab in the Windows task manager. Select "Install.exe" and then click on "End Process". (This step will allow you to get the Futura icon on the desktop)

- 3. Say yes to end program.
- 4. Close out the Windows task manager.
- 5. Say no to view tutorial.
- 6. Close Dialog box (Windows-Start Menu-Program etc)
- 7. Remove CD from tray.

- 8. Install Vista compatibility patch. Wait until "Futura Vista Update screen" comes up. Watch for pop-up screen that tells you the following "Please make sure that Futura machine is connected and switched on". Turn machine on.
- 9. Click finish. Computer will ask to re-start. Click finish.
- 10. Right click on the SINGER<sup>®</sup> Futura<sup>™</sup> shortcut icon, select Properties.
  - Check compatibility mode for Win XP SP2
  - Check to run the program as administrator
