

SINGER® Easter Bunny Embroidery

The sweetest dress for the little girl in your life! Use the pattern to create a dress or embroider on a tote bag for the perfect accessory to carry your Easter goodies.

Shopping List:

- Vogue® Pattern # V7958
- Fabric yardage as required for pattern
- Notions as required for pattern
- 40 wt. Rayon Thread for Embroidery
we used Robison Anton®
- Rabbit embroidery design
- Lightweight cut away stabilizer
- Temporary Spray Adhesive

Fabric Preparation:

1. Cut out dress as directed on pattern.
2. Follow pattern directions to prepare pleated insert for dress front
3. Find and mark both horizontal and vertical centers on the pleated insert. These are the x-y axis lines referred to below.
4. Hoop lightweight cut away stabilizer and spray lightly with temporary spray adhesive.

At the Computer:

1. Turn on the Futura machine.
2. Place large hoop with the stabilizer onto the machine.
3. Open Futura software. In the TEXT portion of the software, type a small period in the text box and apply stitches. Center the pattern by using the center function of the software.
4. Open a new screen and open the Rabbit design.
5. Center the design by using the center function in the software.
6. Transmit the first pattern (the period) to the SINGER® FUTURA™ sewing & embroidery machine. Using the period to find the center of the hoop, place the fabric on top of the adhesive stabilizer and insert the needle in the center of the x-y line. When the fabric is in the desired position, press firmly into place smoothing from the center out. This will assure that the design will sew in the proper position. Cancel transmission.
7. Now transmit the Medallion design to the machine and stitch.
